

Product tear sheet

FATI hanging cachepot

made to suite ceiling height on site, screw fix to ceiling slab or beam
Available as a supply and fit item or supply only

MTO

Finish: standard Dulux or Interpon powder coat colors

Lead time: 4-5 weeks

Origin: NSW

For best results, to avoid over heating to plants, consider placement away from direct sunlight. To extend life span of your cachepot and further aid comfort of the plant, use plastic pot that allows for air gap to all sides of the steel walls of FATI to aid heat dispersion, correct moisture evaporation and air circulation.

It is also highly recommended to sanitize your cachepot before use and before changing plant to new one.
